

MEET THE SPONSORS

MONEYHILL INTERIORS LTD

**PROUD SPONSORS OF
RESTAURANT OF THE YEAR**

The Moneyhill philosophy is to create the most beautiful rooms in your house that reflect the way you live, be it using English handcrafted furniture or sleek state-of-the-art German engineered cabinets.

With 70 per cent of new business coming from client recommendations, our aim is simple – a happy client at the end of a project. We appreciate that it's not easy having major works done, from extensions to the kitchen and we try to minimise the upheaval by meticulously planning a project from installation to completion.

We work primarily with three major furniture suppliers. Davonport furniture is manufactured in Colchester, producing the very best of English design and craftsmanship. We encourage clients to visit the workshop, to feel and touch their furniture in production, and experience for themselves the care taken. Using Davonport we are able to create kitchens, utility rooms, bedrooms, studies, cinema rooms and media pieces in a variety of woods, painted finishes and styles to suit most houses.

Our German furniture comes from Rational and Pronorm, both of which are very capable manufacturers. Their factories endorse the up-to-the-minute components and finishes that we take for granted in this business. They offer the latest lacquering techniques, new materials

to market, and endless colours and finishes. Their robust cabinets and huge pan drawers are strenuously tested not only for quality but for weight and durability.

Our appliance choice is vast, we do however specialise in Wolf and Sub-Zero appliances from the USA – the ultimate in top-end quality and size. We are a Miele partner, displaying a comprehensive range of its legendary cooking, refrigeration, extraction and laundry products. We offer V-Zug appliances from Switzerland and Quooker boiling taps from Holland – a must in every new kitchen. We have a working AGA on display in the showroom and clients are welcome to attend demonstrations and indeed to cook on this traditional English appliance. The list is long, but we are always happy to research or procure a specific product.

Whatever the brief – a house, castle, cottage or apartment – our aim is to maximise space and utilise the latest technology. We produce stunning visual drawings and full CAD plans for builders, and work alongside architects and planning authorities to ensure the space we use is as efficient as possible.

Our team of designers is very experienced and happy to meet clients in the showroom or at home to share the extensive portfolio of projects completed over the past 11 years.

Showroom opening times: Monday to Friday 9am-5pm, Saturday 10am-4pm. Other times by appointment.
